

What is Picture in Picture?

Your DVR allows you to watch two shows at the same time, with the built-in picture in picture (PIP) feature. The PIP buttons are located at the bottom of your Digital Remote.

How to make it work?

1. Press **ON/OFF** and a small PIP screen comes up.

Tip: You will only hear audio from the main screen.

2. Press **ON/OFF** again and the PIP screen becomes bigger.

3. Press **ON/OFF** a third time to hide the PIP screen.

4. Use **CH +** and **-** to change the channel in this screen.

5. To change which show is in the main screen, press **SWAP**.

6. To change the location of the Picture in Picture window, press **MOVE**.

Tip: You can change channels in either screen, but you can only control the video action – like pause, rewind or record – in the main screen.
